

HAROLD ROBERTS (RASH) DIED IN

PRESTWICH HOSPITAL ON MARCH 11th 1985

# HOW MANY MORE BLACK PEOPLE MUST DIE?

The death of Harold Roberts in a mental institution (having been convicted of no crime) shows the hatred and contempt which the police and the courts have for the community in general, and the black community in particular.

The "inquiry" into his death has been a complete cover-up: the authorities have already decided upon a verdict of suicide. We demand the truth!

-Why has there been no mention of the beating he received from hospital staff days before his death?

-Why is nobody allowed to see the toilet cubicle in which he died?

-Why did a policeman at the hospital tell Harold's wife he was a doctor?

-Why was the first inquest held without the knowledge of Harold's relatives?

Even Harold's psychiatric doctor thought that Harold was happy with himself, and did not consider him a suicide risk.

## Harold's death is not an isolated incident !

Following the defeat of the miners, on strike for a year in the face of fierce intimidation and abuse; the police now think they have the upper hand over the communities of Britain:

Jackie Berkeley - raped by Moss Side police over a year ago, and the courts had the confidence to convict her of wasting police time.

Deportations - the Home Office is conducting a racist campaign which results in about 50 people per week being forced to leave the country. Many defence campaigns have been started up in the Manchester area.

The Newham 7 - Asians in London who fought back against racist attacks were arrested by the police while the racists went free. The recent demonstration in their support was attacked by police and more were arrested.

Now is the time for UNITY.

Next campaign meeting 8411 centre (by Moss Side library) Monday May 13th 7:30pm
